

OAuth 2.0 authentication method - SSO

About this page

These pages describe the requirements and tasks for configuring the OAuth 2.0 component in Ubisecure SSO. The result of the installation described in this document is a working environment where OAuth 2.0 is one of the available authentication methods in Ubisecure SSO. The [Installation - SSO Guide](#) contains instructions for installing the Ubisecure SSO Server. A working Ubisecure SSO is required.

[More info about OAuth2 can be found here](#)
