

# Put emojis in CustomerID messages

It is possible to use emojis in CustomerID in the custom text of email messages for various invitations.

Emojis can highlight the message for users in email clients.

For example:

## Message

You can type a message below which will be included in the email sent to the invited user.

Message:*	 Important! Personal message with emoticons for action! When complete let's have a party! 🎉
-----------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	me	[Ubisecure] Kutsu käyttäjäksi / User invitation -  Important! Personal message with emoticons for	14:09
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	me	[Ubisecure] Kutsu käyttäjäksi / User invitation - с днем рождения! Нувä Harry Watson, tämä on kutsu ri	14:03

## [Ubisecure] Kutsu käyttäjäksi / User invitation Inbox x

ubidemo@gmail.com

to me 

 Important! Personal message with emoticons for action! When complete let's have a party! 🎉

## Step-by-step guide

To add an emoji:

1. Copy the emoji from your favourite website such as [Emojipedia](#).
2. Paste the emoji into the custom message text when creating an invitation message.

 Note that the emoji is shown in the message body, not in the title.
