

Role descriptions - CustomerID

`roles.properties` contains the friendly names and descriptions of the roles. The different localizations are included in this file. The configuration is as follows:

`<language>.friendlyName.<role name> = <role friendly name>`

Example:

```
en.friendlyName.OrganizationMainUser = Main User
```

`<language>.description.<role name> = <role description>`

Example:

```
en.description.OrganizationMainUser = Main User can edit other users
```
