

General parameters for selected OAuth 2.0 Identity Providers - SSO

Below is listed a selection of OAuth 2.0 Identity Providers with their general parameters. These parameters have been tested to be working on **14th December 2015**. The list is provided for convenience only and should not be considered as a guarantee of correct parameters. Especially because service providers may apply changes to their interface with or without notice, Ubisecure does not guarantee that the parameters work as is. You must register your application applications at each provider in order to get a client_id and secret.

Live

Register at <https://account.live.com/developers/applications/>

Property	Value
Authorization Endpoint URL	https://login.live.com/oauth20_authorize.srf
scope	wl.basic
Token Endpoint URL	https://login.live.com/oauth20_token.srf
Userinfo Endpoint URL	https://apis.live.net/v5.0/me

Facebook

Register at <http://developers.facebook.com>

Property	Value
Authorization Endpoint URL	https://graph.facebook.com/oauth/authorize
scope	email
Token Endpoint URL	https://graph.facebook.com/oauth/access_token
Userinfo Endpoint URL	https://graph.facebook.com/me

Google

Register at <https://developers.google.com/> to create web application for OAuth sign-in. These settings were verified on 26.3.2019.

Property	Value
Authorization Endpoint URL	https://accounts.google.com/o/oauth2/auth
scope	openid profile email
Token Endpoint URL	https://www.googleapis.com/oauth2/v3/token
Userinfo Endpoint URL	https://www.googleapis.com/oauth2/v3/userinfo

LinkedIn

Register at <https://www.linkedin.com/developer/apps>

Property	Value
Authorization Endpoint URL	https://www.linkedin.com/uas/oauth2/authorization
scope	
Token Endpoint URL	https://www.linkedin.com/uas/oauth2/accessToken

Userinfo Endpoint URL	https://api.linkedin.com/v1/people/~?format
-----------------------	---

Vkontakte

Register at <https://vk.com/dev>

Property	Value
Authorization Endpoint URL	https://oauth.vk.com/authorize
scope	
Token Endpoint URL	https://oauth.vk.com/access_token
Userinfo Endpoint URL	https://api.vk.com/method/users.get
Configuration String	userinfoEndpointAccessTokenParameter=access_token

Login with Amazon

Register at <https://developer.amazon.com/public/apis/engage/login-with-amazon>

Property	Value
Authorization Endpoint URL	https://www.amazon.com/ap/oa
scope	profile
Token Endpoint URL	https://api.amazon.com/auth/o2/token
Userinfo Endpoint URL	https://api.amazon.com/user/profile

GitHub

Register at <https://developer.github.com/apps/building-integrations/setting-up-and-registering-oauth-apps/about-authorization-options-for-oauth-apps/>

Property	Value
Authorization Endpoint URL	http://github.com/login/oauth/authorize
scope	user
Token Endpoint URL	https://github.com/login/oauth/access_token
Userinfo Endpoint URL	https://api.github.com/user
